Dan,

This was a company initiative to remove C2s from the warehouses in regards to DEA investigations. While the financial impact of no longer selling C2 items from the Walgreens DCs was taken into consideration, there is a greater risk to the company in fines and loss of licenses if we continue to sell these items in our warehouses. As changes are made to the systems, these items, since they are no longer considered as warehoused items, will fall off the report.

**Be Well,  
Barb**

Igor,

I have concerns about the shrink sets we have because of the issue with getting generics from the jobber. The controlled substances we get from Cardinal are so much more expensive than what we used to be able to get from warehouse. Is this something the company is addressing or should I send in the changes I feel we need? Without these changes, we may have significant physical inventory issues.

The graphic below shows the change in generics from cardinal

Thank you for your advice.

Dan

Hey Dan,

Marie would like the RX operating statements reviewed and change any RX's that are currently set to Zero. Please let me know if you need my help.

We also need to set up the next LPX review day. Let me know if what day works for you. Maybe we could review statements then.....

Thanks,

BH
